EXPERT ADVICE

Mr. Sandeep Jain

Founder & CEO - GeeksforGeeks

He started this Journey with just one thought- every geek should have access to a never ending range of academic resources and with a lot of hardwork and determination, **GeeksforGeeks** was born.

Through this platform, he has successfully enriched the minds of students with knowledge which has led to a boost in their careers. But most importantly, GeeksforGeeks will always help students stay in touch with their Geeky side!

“ I understand that many students who come to us are either fans of the sciences or have been pushed into this field by their parents.

And I just want you to know that no matter where life takes you, we at GeeksforGeeks hope to have made this journey easier for you. ”

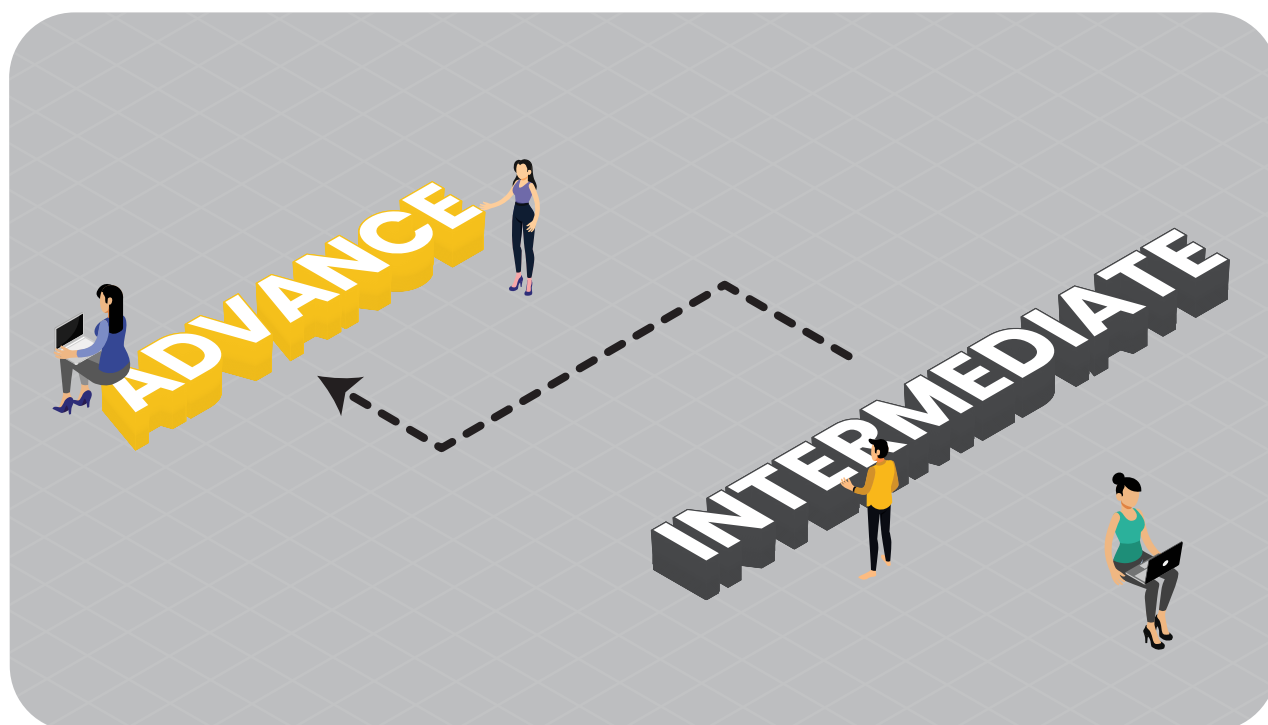

COURSE OVERVIEW

The Kotlin programming language will be used to teach you the fundamentals of creating Android apps. You'll create a collection of apps along the way to kickstart your career as an Android developer.

[VIEW DETAILED SYLLABUS](#)

The **Doubt Assistance** would be available for a period of 6 Months post the completion of the course and the **Course Recordings** will be available for an year post the completion of the batch.

Minor Project

- Making a calculator app
- To-Do list app project (using Kotlin and XML)
- News App - An app to fetch news articles using an API and display them.

Major Project

- Creating an Instagram like social media application

REVIEWS

Satyam Singh

Excellent course for those who want to learn android development with kotlin from scratch.

Saksham Goyal

It was a really good course, everything is well-organized and the concepts are well taught. It is worth opting for this course!

Ruksana

I got sufficient practical exposure through the live sessions & projects. Loved it!

Pallavi Singh

I loved the way mentor taught us. My queries were resolved efficiently. I would say GFG is the best platform to grow as a programmer.

Gagandeep Sethi

Amazing course with the best mentor! I had a great learning experience with GFG!

QUESTION & ANSWER

I have very basic knowledge of the kotlin language. I am interested in android development. Will I be able to cope up with this course?

Basic knowledge of kotlin is more than sufficient to initiate this course. This is a Live course, you will get hands-on experience along with theoretical concepts.

Is this course suitable for students or working professionals?

This course is suitable for both students and working professionals who are interested in learning android application development with kotlin and want to gain practical experience.

Are projects important? Will I be able to add the project made in this course to my resume?

Projects do play an important role to showcase that a candidate not only has conceptual knowledge but also has hands-on experience on the technology which is beneficial in bagging out great opportunities. This is a live course, candidates will be making the projects under the guidance of the mentor. These projects can be easily showcased in their respective resumes.

What if I miss out on any Live-session?
How will I cover up?

To help out the students in every possible way, we provide the recordings of the Live lectures that are conducted. If a student misses out on any lecture, he/she can find the recordings and can go through them. In case of any further queries, they can be resolved with the help of the mentor. The recordings are uploaded in the next 48 hours of the class and are available to students for 1 year post the completion of the course.

How does Doubt Support work?

There are 2 ways in which student can get their doubts resolved:

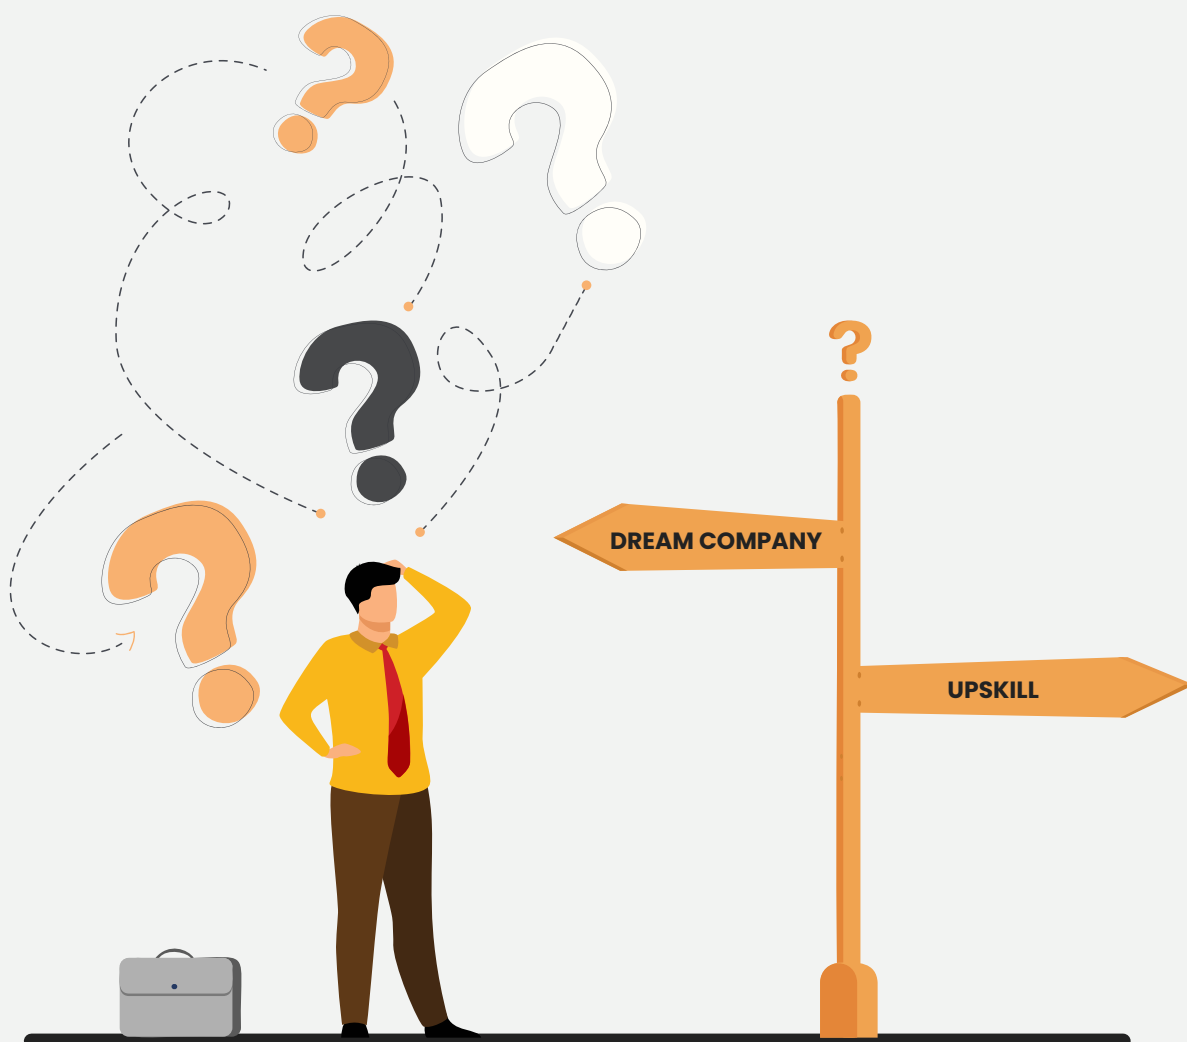

1. During the weekend live classes, you can directly ask doubts from the mentor.
2. There is an inbuilt Doubt Support in the course. You can simply comment & ask your doubts there. Furthermore, if your doubts are still not resolved, the mentor would be connecting with you over Google Meet to resolve your doubts.

Still unsure about course?
